We cover a wide range of product portfolio

"MADE IN TURKEY"

Turkey is at the very centre of all major buying and sourcing areas of the Eurasia zone, whilst enjoying Turkish & international raw materials at competitive prices.

Turkey is the optimum mix of all the key parameters in the fashion industry: Quality, flexibility, competitiveness and speed. Amongst all the global garment manufacturing centres today, Turkey alone offers a perfect balance of all above criteria.

Each of our product categories are supported by at least two producers in our portfolio. This versatility allows us to enjoy a variety of handwriting, as well as manage supply chain risks to protect the interests of our clients.
